Conclusions:

- Asymmetric Total syntheses of **(-)-Galanthamine** and **(-)-Lycoramine** based on two metal catalyzed reactions
 - a. Pd-catalyzed **intramolecular Larock annulation** to construct **3,4-fused tricyclic benzofurans**
 - b. **Enantioselective conjugate addition** of 3-alkyl substituted **benzofuranone to MVK**; catalyzed by $\text{Sc}^{\text{III}}/\text{N},\text{N}'\text{-dioxide}$ complex
